

3 Courses

Major Engineering Project Performance

Major Engineering Projects: Governance, Risk and Scope

Financing and Initiating Major Engineering Projects

UNIVERSITY OF LEEDS

Jul 25, 2020

Dr. Giorgio Locatelli

Dr Giorgio Locatelli, Lecturer of Infrastructure Procurement and Management School of Civil Engineering, University of Leeds

BIKASH POUDEL

has successfully completed the online Specialization

Managing Major Engineering Projects

In this Specialization, learners developed their project management skills in engineering and prepared to deliver large engineering projects. They identified the key factors why major projects fail, learned how to manage risk and scope, how to deal with stakeholders, and how projects are financed and initiated. In each of the courses in this Specialization learners completed a project which focused on a real-life case study. They developed templates, tools and presentations to demonstrate their mastery of engineering project management techniques. Preparation for the projects involved research into their chosen case study, and reflection on how the outcomes of their research might change their own professional practice.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
